

# Data Access

We Get Your Data

## Data Access

Patient critical data is stored in MEDITECH Live, data repositories, and various databases. Access to this data may require many different methods, systems, and protocols in order to get a holistic view of the patient data. IPeople can provide a single point-of-entry to all of your data sources, minimizing waste and frustration.

## IPeople Connect

IPeople understands the importance of having direct, real-time access to your MEDITECH data. Our IPeople Connect solution provides your organization with bi-directional, open integration with MEDITECH and most standard database systems. IPeople Connect allows you to:

- Access MEDITECH data real-time using industry standard solutions
- Make your MEDITECH data available to other applications
- Script into any MEDITECH platform
- Explore and access all of your data within MEDITECH and disparate systems

## IPeople Connect solutions includes the following components:

### IPeople Direct **New Release Coming Soon!**

You shouldn't have to be a programming expert to query your MEDITECH data. IPeople Direct allows you to access your MEDITECH data with universally-known solutions such as Excel, Access, Crystal Reports, and SQL Server. IPeople Direct works behind the scenes to provide you with secure, real-time access to your MEDITECH Magic, Client Server, and M-AT data, and even allows you to create simultaneous queries across disparate systems. Querying, report writing, and data extractions have never been easier!

### IPeople Scout

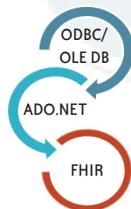

Bridge the gap between you and your data! Searching for your data when it is in disparate systems can be very task oriented, timely and very frustrating. IPeople Scout offers a wide range of tools that make it easier to find and organize your data. IPeople Scout encompasses technology that helps you get to know your data with Smart Joins, categories, tags, aliasing, notes, views, and exports. Reduce search times and identify data crosswalks, comparisons, and discrepancies.

## OUTBOUND CONNECTOR

Real-time and direct MEDITECH query

**IPeople Direct**

## DATA EXPLORATION

Explore tables, fields, data, relationships, and more across multiple systems

**IPeople Scout**

*"Thanks again for having such a great product... I have no idea how I would've gotten around this without Echo."*  
David Rothbauer, Application Analyst, Huron Perth Healthcare Alliance/Alexandra Marine & General Hospital

## **IPeople Echo** New Release Coming Soon!

Create a customized data repository with IPeople Echo's web-based data download manager and repository builder. IPeople Echo makes it easy for you to capture and store data useful for historical reporting that would otherwise be lost due to data purging; download data for trending analysis; and store data for disaster recovery preparedness. Create, schedule, and monitor custom downloads to a SQL server without having to write a line of code!

### **OUTBOUND CONNECTOR**

## **IPeople Script** New Release Coming Soon!

IPeople Script's intuitive wizards allow you to automate the script-writing process and eliminate the manual typing of data into MEDITECH. Both technical and non-technical users will find benefit from IPeople Script's object-oriented scripting approach and flexible script-building features such as drill-down capabilities, auto-recovery, and alert notifications. IPeople Script can work outside of MEDITECH with other applications. In addition, it includes the ability to perform real-time queries against MEDITECH and other data sources, and supports the simultaneous running of scripts for supported platforms.

### **INBOUND CONNECTOR**

## **IPeople Connect, complimented by a variety of innovative services:**

### **Remote DBA Services**

Need a helping hand with your database administration resources? Increase your confidence in the understanding of your database health with the help of IPeople remote DBA's. Our remote DBA services provides experience in database administration and database server checkups within the healthcare IT sector. Reduce cost and increase efficiency with IPeople's collective insight.

### **Report Writing Services**

Is your IT department seeing a rise in the demand of detailed reporting across multiple platforms? IPeople offers report writing services using NPR Reports, Report Writer (M-AT), and SQL. Our in-depth MEDITECH data knowledge ensures we get the job done quicker and carry you beyond the limitations of NPR to create custom applications and perform complex reports. By adding these services you will see a savings in your resources used.

### **IPeople Select DR**

Get ahead of the game by utilizing IPeople's extensive knowledge of MEDITECH data and data structures across all MEDITECH platforms. IPeople will take a strategic approach while building your data repository that supports your MEDITECH DR. Have confidence knowing your data repository was built using best practices and tuned to be as efficient as possible.

### **Custom Script Development**

Need specific data entry into MEDITECH or other systems, NOW? IPeople provides an immediate and experienced resource to help with your custom scripting needs. Our solutions are tailor-made to meet your needs.

*"IPeople Direct is a great product! One of our main benefits is the integration with SQL Server Integration Services. Using IPeople Direct's OLE DB driver, we can download many different sets of data simultaneously across our system at all times throughout the day. We usually average 100+ queries running at any given time during the day. Also, the support staff is great to help us with complex queries. It really is a great product."*

Brandon Tolleson / System Development / Arkansas Children's Hospital
